

1.  
This is the landing  
page, and shows global  
data

## SDG Index and Dashboards Report 2018

# Global Responsibilities: Implementing the goals

## Sustainable Development Goals

We'd like the 17 SDGs underneath the heat map.

Clicking on individual SDGs changes the map to show a heat map for that SDG. The countries on the map are then colored in the 5 colors used in the dashboards on the PDF: green, yellow, orange, red and grey

## The SDG Index

Underneath we'd like all of the countries listed, similar to the World Justice Project site: <http://data.worldjusticeproject.org/> but we're open to your design ideas.

This should show: each country's rank, region, all 17 SDG values, and overall score.

Selecting a country here could also open that country's "Country profile" page

We'd like the option of sorting these countries by rank, region and ABC

# SDG Index and Dashboards Report 2018

## KENYA

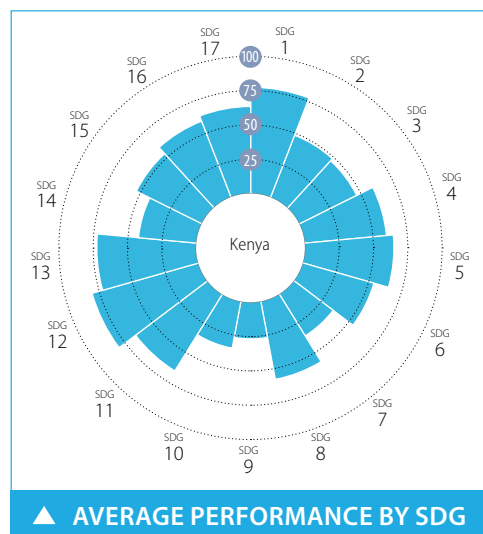

Sub-Saharan Africa

2.

Each country page presents the general content that is on the Country Profile Example PDF.

### To include on each Country Profile page:

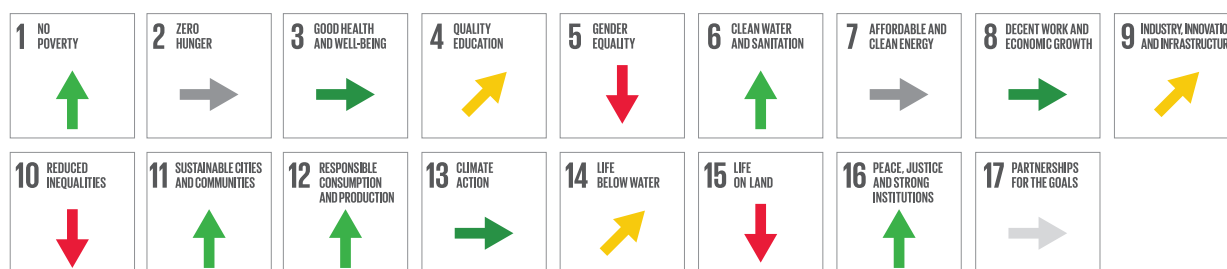

- Country name and region
- GDP
- Index score
- Regional average score
- SDG Global Rank
- Average Performance by SDG (polar chart) [SDG SCORE]
- SDG DASHBOARD (each SDG colored to indicate overall score)
- SDG Trends Dashboard (an arrow for each SDG indicates trend)

### Current Assessment – SDG Dashboard

### SDG Trends

### Performance by Indicator

The user can select any one of the 17 SDGs: within the [SDG Dashboard](#), or the [Trends Dashboard](#), or the [polar chart](#), or from a drop-down list. This will then populate information for that country on that SDG and its group of indicators - the data given on the right-hand page of the Country Profile Example PDF

#### DATA TO INCLUDE HERE:

- Country name and region
- SDG number, name and icon
- SDG 2018 value for that country (the same number as used in the polar chart)
- SDG color rating and trend arrow
- the list of indicators that make up that SDG
- For each of these indicators, the value, color rating, and trend arrow
